

# **STA 393: Independent Research in Statistics**

## **I. Basic Course Information**

**STA 393** "Independent research in Statistics", is an upper level in which students engage in research experiences in statistics. Independent Research experiences are expected to produce new knowledge by the student in collaboration with a faculty member and/or with fellow student researchers and a faculty mentor. The student will be expected at the end of the semester to write a paper which will be presented to the department or to a state or national conference. Students must have a 3.0 GPA in their mathematics and statistics courses to register for the course.

The faculty mentor and the student will write a proposal explaining the subject matter that will be studied as well as the way the student's work will be assessed. An independent research contract/enrollment form must be prepared by the student, approved by the faculty mentor and the department chairperson, and submitted to the Office of Records and Registration at the time the student registers for the course. Registration for independent research will be accepted only through the first week of the semester.

At most one course unit of Independent Study, Guided Study, or Independent Research may count as one of the Mathematics or Statistics options for a major. The total course load of a student taking Independent Study, Guided Study, or Independent Research should be at most 4.5 course units. Independent Study, Guided Study, or Independent Research courses may not be taken in order to improve a grade, or to replace a course that a student failed to sign up for.

## **II. Learning Goals**

1. A deep understanding of some selected topics in statistics.
2. To enhance a student's ability to solve difficult problems in a certain area in statistics.
3. To improve a student's ability to read and write statistics.
4. To improve a student's ability to conduct literature searches in the discipline.
5. To improve a student's ability to communicate orally their results.

## **III. Students Assessment**

Students will meet with their faculty mentor on a weekly basis. They will be continuously assessed, by the faculty mentor, based on their weekly progress. At the end of the semester students must submit their results in a paper that they will present to the department or to a national conference.

#### **IV. Learning Activities**

The learning activities will be decided by the faculty mentor. They will be specified in the original proposal submitted to the department chairperson for approval.
